## Media Release

### Optimum Technology wins adult offender supervision system for the United States

December 6, 2022 - Powell, OH - Optimum Technology, Inc., announces they were selected to maintain and upgrade the United States adult offender supervision system.

The system regulates the movement of probationers and parolees across state lines in all 50 states, and three U.S. territories; District of Columbia, U.S. Virginia Islands and Puerto Rico. The system enhances public safety and offender accountability. It has become a powerful and adaptive tool for promoting and ensuring cooperative action among the states and the single standard of supervision for adult offender movement.

Greg Davda, Sr. Chief Sales and Marketing Officer for Optimum stated “With this addition, Optimum is now responsible for both the national juvenile supervision system and adult supervision system. We couldn’t be prouder of our selection.”

It is an expansion of Optimum’s service and software portfolio that includes records management, computer aided dispatch, federated search and data sharing solutions.

#### **About Optimum Technology:**

Optimum Technology, Inc. was founded in 1984 in Columbus, OH and is a national leader in technology solutions for State and local government, having served public safety and justice agencies in all 50 states, District of Columbia, Guam, US Virgin Islands and now Puerto Rico. Optimum’s mission is to work in partnership with state and local government to provide technology that is current, relevant, and focused on keeping communities safe.
