## Media Release

### Optimum Technology improves the way states and US territories share information regarding juvenile offenders

September 8, 2021 - Powell, OH - Optimum Technology, Inc., announces the release of **SWIFTJUVENILE™**, a juvenile justice data system.

**SWIFTJUVENILE™** is a cloud based juvenile justice data system that facilitates state and local governments, law enforcement agencies, and social services agencies to better track and manage items such as the return of runaways, probation/parole absconders or escapees, accused delinquents, the status of offenders, the transfer of supervision, progress and violation reports, and travel permits.

It is an expansion of Optimum's **SWIFT** software product catalog that includes records management, federated search and data sharing solutions.

The software is now in use in all 50 states, the District of Columbia, and the U.S. Virgin Islands. The software allows agencies to improve collaboration and allows agencies quick ways to communicate and share data with the goal of preserving child welfare and promoting public safety.

"**SWIFTJUVENILE™** is designed to replace older systems that were more focused on document management with rudimentary workflows. In addition to document management, our software is focused on business process automation, vastly improved workflows, is accessible from any modern web browser, is device agnostic, and is easier of use." Josh Davda, President and CEO, Optimum Technology said.

#### About Optimum Technology:

Optimum Technology, Inc. was founded in 1984 in Columbus, OH and is a national leader in technology solutions for State and local government, having served justice and public safety agencies in all 50 states, District of Columbia, Guam and the US Virgin Islands. Optimum's mission is to work in partnership with state and local government to provide technology that is current, relevant, and focused on keeping communities safe.
