Optimum Technology Invited to Participate in White House Criminal Justice Summit

March 10, 2023 - Powell, OH - Optimum Technology, Inc., announces it will be participating in a by invitation only Criminal Justice Summit, in person at the White House in Washington, DC on Wednesday , March 15th, 2023.

The White House’s Office of Science and Technology Policy (OSTP) invited Optimum Technology to discuss “...best practices in supporting law enforcement with software development, design, and deployment...” said Patrick Clowney, PhD, White House Leadership Development Program Fellow.

The Summit is an extension of the Administration’s commitment to criminal justice reform and making communities safer and aims to bring the voices of software companies and software vendors into this conversation. Additionally representatives from academia, representatives from technology groups, the General Services Administration, Department of Justice, and use of force experts will also be invited to meet with the U.S. Chief Data Scientist and her team during the Summit said Patrick.

“It is an honor to be invited” said Josh Davda, CEO and President of Optimum Technology. “As a minority owned company, it says a lot about what our team has done over the years to be recognized as experts within the industry and have a voice in helping guide public safety reform”.

About Optimum Technology:

Optimum Technology, Inc. was founded in 1984 in Columbus, OH and is a national leader in software solutions for state and local government, having served public safety and justice agencies in all 50 states, District of Columbia, Guam, Puerto Rico and the US Virgin Islands. Optimum’s mission is to work in partnership with state and local government to provide technology that is current, relevant, and focused on keeping communities safe.
